EZSMART

EZ-One Woodworking Center-EZT1000

The EZSMART EZ-One Woodworking Center can break down sheet goods like a panel saw, make repeat cuts like a table saw and cut to length like a miter saw. Our industrial grade track & patented bridge eliminates pushing material against the forces of a spinning blade, bit or knife. All cuts are made safely without tear-out or kick-back.

Universal Edge Guide - EZUEGSB1

Turn almost any circular saw into a precision cutting system with the EZSMART Universal Edge Guide. Your circular saw mounted on our saw base takes your cutting experience to a whole new level of safety and precision, putting you in total control. Attach the EZSMART Universal Saw Base to the EZSMART Universal Edge Guide, set it to 24" wide, and you can cut down 4' x 8' panels, even in the vertical position, safely. Remove it from the EZSMART Universal Edge Guide, and it can be used on EZSMART Guide Rails. Lightweight, compact and portable, there is no faster, safer way to make straight, repeatable cuts.

Clamping Bench System & Clamping Bench Top EZT300, EZT3001

From the size of the work surface, to the number of clamping points, the EZSMART clamping Bench is unrivaled and will enable you to easily handle all of your assembly, joining, routing, drilling, sanding and other woodworking projects. The EZSMART Clamping Bench Top provides 8 clamping points allowing you to position your work exactly where you want it!

Multiform Master Table- EZT2000 & Table Top Kit- EZT2300

Compatible with all EZSMART extrusions and tools, you can transform from a tool stand to an extendable top in minutes simply by inserting the extrusions that hold the sacrificial wood. With the EZSMART Multiform Table Top Kit and your own wood, you can build your own extendable top. Simply screw the 8 pieces of extrusion to your bench or a sheet of 4' x 2' plywood, insert your sacrificial wood into the plastic extrusion and then slide the two extrusions together. You can now extend the pieces out to support a full 4' x 8' panel for working or cutting.

Smart Tools

Miter Square & Handle Combo - EZSHC200

Switch from squaring panels, cutting large panels, cross cutting lumber and narrow pieces, all with the same setup. No clamps are needed as the Miter Square handle is designed to apply pressure to the materials acting like a clamp as you move between cuts, safely and accurately, without removing the saw from the EZSMART Guide Rail. (Included in the Cabinet Maker Set). Lightweight and portable, the EZSMART Square and Handle Combination attaches easily, without tools, to the EZSMART Guide Rail.

Cabinet Maker Set - EZCMS100

Now you can switch from squaring panels, cutting large panels, cross cutting lumber and narrow pieces, all with the same setup. Lightweight and portable, the EZSMART Cabinet Maker Set attaches easily, without tools, to the EZSMART Guide Rail. No clamps are needed as the Miter Square handle is designed to apply pressure to the materials acting like a clamp as you move between cuts, safely and accurately, without removing the saw from the EZSMART Guide Rail. With the repeater arm attached, you can make accurate repeat cuts, without measuring, up to 36 inches on the right hand side of the blade or 42 inches on the left hand side of the blade.

Repeater Set - EZREP1500

Make easy straight and tapered repeatable cuts without measuring and marking the materials. Our Repeater installs easily without the need for tools and are the ideal accessory to the Guide Rail.

Super Smart Routing Kit - EZR2000

Make straight and uniform fluted columns, long and clean dado cuts, precise sliding dovetails, repeatable mortise and tenon joinery, sweeping arcs, and duplicate odd shaped pieces unleash your routers full potential. The EZSMART Super Smart Routing Kit gives you this control along the X, Y, & Z axis..

Super Smart Routing Kit Replacement Base EZR2500

Quickly and easily switch from one router to another using our Routing Kit. Our Kit also has the ability to mount other tools to this base such as a Jigsaw, Dremel tool, and more!

Tracks & Extrusions

***Voted best in anti-chip protection by Fine Home Building on both sides of cut**
*** Voted best in straightness and connection by WOOD Magazine * Voted best in Home Tech by This Old House***

Confidently and safely use your own circular saw mounted on the EZSMART Universal Saw Base and Guide Rail. You'll make long precise rip cuts, cross cuts, and angle cuts. With your wood captive under the track there is no danger of kickback. The saw follows the track and puts you in complete control.

Whether you're cutting small custom pieces or ripping 4 X 8 sheet goods our Track Systems come in various lengths from 36 inches up to 118 inches to help you tackle that project!

Clamps & Systems

EZSMART 3" & 6" Bench Clamps

Use the EZSMART 3" & 6" Reach Bench Clamps on any of the EZSMART workbenches or tables to hold and secure your project, on the top, underneath, on the side, just about anywhere you wish. They are designed to be used in conjunction with all of the different types of extrusion created by EurekaZone that have channels.

3" Bench Clamps - EZCLAMPB3

- Jaw accommodates stock up to 3-¼ thick.

6" Bench Clamps - EZCLAMPB6

- Jaw accommodates stock up to 6-¼ thick.
- Clamps will rotate through a full 360°.
- Applies pressure where you need to secure your stock or project for processing, gluing, or assembly.

Smart Clamps

Use the EZSMART Clamp on any of the EZSMART workbenches or tables to hold and secure your project, on the top, underneath, on the side, just about anywhere you wish. They are designed to be used in conjunction with all of the different types of extrusion created by EurekaZone that have channels.

The "Regular & "Deep" Smart Clamps are perfect clamp for the EZsmart Track Saw Systems. 360 Degree Rotation for multiple clamping set ups

- Non-marring PVC tip jaw.
- PVC tip prevents slipping and walking of material.
- Ideal for use on softer woods or finished surfaces.

Regular Smart Clamps - EZCLAMPREG

- Jaw accommodates stock up to 2-¼ thick.

Deep Smart Clamps - EZCLAMPD

- Jaw accommodates stock up to 4-¼ thick.

Hold Down Clamps - EZCLAMPHD

- Jaw accommodates stock up to 5-¼ thick.

Clamping System

Smart Clamping System - EZCLAMPSYS

Safely and accurately cut the narrowest strips of material, secure narrow stock and perform straight, tapered or mitered cuts, ideal for making cabinet fillers, and other small parts. The EZSMART Clamping System is the safe and accurate solution to many difficult cuts.

The Smart Clamp at work securing the Guide Rail to the wood to be cut. The EZ Multiform Table provides support for the operation.

EZ Ready Power Tools

Our Universal Saw base can be fitted to most left or right handed 6-1/2, 7-1/4, and 8-1/4 circular saws currently on the market including our very own EZ Smart saw!

No need to purchase a specialty saw!

Track Saw System Accessories

Universal Saw Base Insert Pack - EZUSBINPK

The EZSMART Universal Saw Base Insert Pack contains each of the inserts needed to provide anti-kickback protection and chip free cuts when using the EZSMART Universal Saw Base. The width of blades vary and create different kerfs, to ensure that you maintain "zero clearance" on each side of the blade, you should have "off rail" and "on rail" ant-chip inserts prepared for the blade that you are using.

Anti-Chip Edge - EZACE

EZSMART Anti-Chip Edge provides for "Zero Clearance" on the "guide rail" side of the saw blade and can be easily removed for replacement. Once installed and prepared, the EZSMART Anti-Chip Edge is unique to the angle of the cut and the kerf of the saw blade used. Purchase separate lengths of EZSMART Anti-Chip Edge for each of your commonly made angled cuts or when a blade change is made that creates a significant variation in the kerf. Sold in Packs of 3.

WHO WE ARE

Like you we enjoy woodworking! Whether you build homes for a living, create small garden sheds for yourself or make and repair furniture for your family and friends. Our system allows you the woodworker to feel confident and inspired while working on your project. The EZ Smart system merely adapts and expands the woodworking process by using power tools you already own. Our facility is located in Ocala, Florida where we manufacture what you see in this brochure. Most of the materials used are sourced right here in the United States including Ocala, Orlando, Kentucky, New Jersey and California. We enjoy what we do here in Florida and hope you enjoy using our tools too!
